Request for Extension: Refined Abstract by Tomorrow Morning

27 封邮件

Kou Shu <zhouhengyu21510@gmail.com>

2026年8月26日 17:37

收件人: Susumu Goto <goto@dbcls.rois.ac.jp>

Dear Professor Goto,

I am writing to apologize that I will need a little more time to finalize my abstract. I realized I need to refine it further to ensure the quality, so I would be very grateful if I could submit the updated version by tomorrow morning instead.

I will upload the refined abstract to the seminar note and also send it to you via email once it is ready.

Thank you very much for your understanding and patience.

Best regards,
Hengyu Zhou

收件人: Kou Shu <zhouhengyu21510@gmail.com>

Hi Zhou-kun,

OK. Please let me know when you finish your edits.

Best regards,

Susumu

Dear Professor Goto,

Thank you for your understanding.

I have finished refining my abstract. Here is the link to the Google Doc: [refined abstract](#). I also updated it in our Seminar notes.

Thank you for taking the time to review it. I would appreciate any comments on areas you find confusing or that need improvement.

Best regards,
Hengyu

Hello Zhou-kun,

I have edited the first page.
Please check if it correctly reflects your intention.
Maybe you can use chatGPT for English editing.

Regards,

Susumu

Dear Professor Goto,

Thank you very much for taking the time to revise and annotate my abstract. I will go through your comments this weekend and further polish the wording with the help of AI tools.

Since the submission deadline is Monday at 12:00 PM, would it be possible to send you the revised version for a final check sometime over the weekend, or early Monday morning at the latest?

Best Regards,
Hengyu

收件人: Kou Shu <zhouhengyu21510@gmail.com>

hi, Zhou kun,

sorry not being able to take time to check,
but could you try to refine your English by yourself by using llms?
There are many grammatical errors and sentences difficult to understand, even in phrases I suggested.

I think I can check the rest tonight, so please finish your part by then.

Best

Susumu

Hello Professor Goto,

I have fixed some grammatical errors and refined the readability of the Current Results and Discussion section based on the pattern of your feedback.
I will continue refining it with the help of an LLM.

Thank you for taking the time to review the remaining sections. I will finish the revision this afternoon.

Best Regards,
Hengyu

Hi Professor Goto,

I've finished revising all four sections with the help of Claude,
checking each for grammar, clarity, and consistency of terminology and citations across the whole draft.

The document is ready whenever you have time to look at it tonight.
Please let me know if anything still needs further revision.

Thank you again for your patience and guidance.

Best regards,
Hengyu

PS. If you use round and iteration as the same meaning, it would be better to use only either of them.

收件人: Susumu Goto <goto@dbcls.rois.ac.jp>

Hi Professor Goto,

Thank you for the comments and edits.

I've checked and incorporated all of them, including the three comments on the axis-2 definition, the point ordering in Current Results, and the opening sentence of the Discussion section, as well as your note on using "round" consistently instead of mixing it with "iteration."

Please find the final version attached.

Let me know if anything still needs adjustment before it goes to the subreviewers.

Best regards,
Hengyu

Dear Professor Goto,

I hope this email finds you well.

Thank you very much for your time and valuable guidance during my mid-term presentation. I really appreciate your feedback.

I have two quick questions:

1. Regarding the comments from the reviewers on my presentation, will these be shared with me through you?
2. Could you please let me know your availability for scheduling our next seminar?

Thank you for your time, and I look forward to your reply.

Best regards,
Hengyu

收件人: Kou Shu <zhouhengyu21510@gmail.com>

Hi Zhou-kun,

I am not sure you looked at the slack message, but you did a good job for your presentation!

As for the comments from the reviewers, those at the presentation are all and overall responses were good.

I have two comments related to reviewers' comments:

1. $F1 = 0.8$ (SOTA) may not be good enough for replacing manual annotation with LLM annotation. So it would be necessary to achieve much better results by the refining process. You can also consider that the LLM annotation will still have some supports for manual annotation and not saying it will fully replace manual annotations.
2. You might have a better answer for the question about the generalization of the documents (annotation guidelines). It should be not just adding some sentences from the gold examples, but also modifying or deleting the original texts.

Regarding the next meeting, how about 15th Tuesday?

I will be attending BioHackathon, but I think I can spare time for the meeting.

Best regards,

Susumu

Hi Professor Goto,

I apologize for missing your message on Slack.

Thank you very much for the feedback.

I have noted down the reviewers' comments from the presentation, and I agree that your two points are very reasonable. I will make sure to incorporate them into the final presentation.

Regarding the next meeting, the 15th (Tuesday) works well for me. Since you will be attending BioHackathon, I assume the meeting will be held online, but please let me know if that is not the case.

I am free the entire day on the 15th, so please let me know what time would be most convenient for you.

Best regards,
Hengyu

Dear Professor Goto,

I hope you're doing well.

I'd like to ask about the seminar we scheduled for September 25 (Fri) at 11:00. I'm sorry for the short notice, but I've just found out I need to have ear surgery that day, so I was wondering if it would be possible to reschedule. Would September 24 (Thu) afternoon work on your end instead?

Also, on a separate note, I looked into the round-trip transportation cost to Kitasato University for Tochothon, and it comes to about 3,000 yen. Would it be possible to get this reimbursed? If not, I'd like to join online instead.

Sorry for the two requests at once, and thank you for your understanding.

Best regards,
Hengyu
